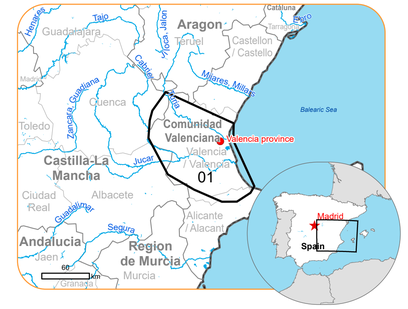
EMSR773 - AOI01
Flood In Valencia Region, Spain
VALENCIA PROVINCE

Situation as of 08/11/2024 05:51 UTC

Delineation MONIT04 - Overview map 01



Flooded area 6,702.5 ha

Potentially affected population ~ 550

Potentially Affected Built-up and Transportations

Road 176.7 km

Built-Up 0.1 ha

Estimated flood depth (m)
- Below 0.50
- 0.50 - 1.00
- 1.00 - 2.00
- 2.00 - 4.00
- 4.00 - 6.00

Reference layers available in the vector package

Event: On 29 October 2024 at 14:30 UTC, an extraordinary rainfall event affected the Valencia region. High water levels in rivers caused flooding in Ribera Alta, Horta, La Plana de Utiel and Letur river. On 31 October 2024, extraordinary precipitation caused flooding in the Castellon Province area. Copernicus EMS Rapid Mapping is requested to provide emergency mapping of flood extent, Monitoring and classification damages emergency mapping.

Data sources and analysis: Pre-event image: Sentinel-2B (2024) (acquired on 12/08/2024 at 10:46 UTC, resolution 10 m). This image is used as background image.

Post-event image: COSMO-SkyMed © ASI (2024), distributed by e-GEOS S.p.A. (acquired on 08/11/2024 at 05:51 UTC, resolution 15 m).
Image provided under COPERNICUS by the European Union and ESA, all rights reserved.

The thematic layer has been derived from post-event satellite image using a semi-automatic approach. Please be aware that the thematic accuracy might be lower in urban and forested areas due to inherent limitations of the SAR analysis technique.

The flood depth information is based on the analysis of post-event satellite imagery and on Digital Elevation Model data. The maximum flood extent corresponds to the flood observed in all previous products (cumulative analysis). The flooded area corresponds to the water observed in the most recent satellite imagery, excluding the permanent water.

Map produced by SERTIT released by e-GEOS on the 08/11/2024.
